

CLIMATE OUTLOOK FOR JUNE 2025

Warm and dry June

In all of Serbia, mean June air temperature is expected to be above the multiannual average with the anomaly around $+3^{\circ}\text{C}$. Mean June air temperature is forecast to range from 22°C to 25°C in the lowland, and from 12°C to 17°C in the hilly-mountainous regions. Mean maximum June air temperature is forecast to range from 27°C to 30°C in the lowland, and from 16°C to 22°C in the mountainous regions. Mean minimum air temperature is predicted to range from 13°C to 19°C , and on the mountains from 8°C to 12°C . Number of summer days with the air temperature of 25°C and above is forecast to range from 20 to 26 days, in Belgrade 23 days, and on the mountains up to 10 days (at Zlatibor).

June precipitation sums are expected to be below the average. In the lowland, precipitation sums are expected to range from 40 to 80 mm, and on the mountains up to 100 mm, locally even more due to the expected convective development. In June, number of days with precipitation is expected to range from 5 to 8 days in the lowland, and up to 12 days in the hilly-mountainous regions (Zlatibor).

Note: Climatological reference period is 1991-2020. Monthly climate outlook is produced once a month based on the available products of the monthly and seasonal forecast. More detailed forecast per week, for the following 30 days is updated on Friday and available on the following link: <http://www.hidmet.gov.rs/podaci/meteorologija/ciril/biltenranenajave.pdf>
